Innovative Company
Fulfilling the Promise of
Next-Generation (Convergence)

MAIL OBJECT edits a range of **low cost** messaging systems:

MailObject® (GLOBAL COMS) (E-MAIL COMS) (BACKEND COMS) (WEBMAIL COMS) (GATEWAY COMS)

and a range of specific applications:

MailObject® (FAMILY COMS) (MULTISITES COMS) respectively designed for residential and professional markets.

The MailObject® technology handles in a transparent way all kinds of devices.

It can be set up on server platforms under Unix (Solaris, Linux).

For the past fifteen years MAIL OBJECT technical teams have proved their ability

and competency in this specialized field of electronic messaging.

MAIL OBJECT is "Young Innovative Enterprise" certified.

The MailObject® Messaging System is a new breed of product with a completely new approach to deliver value to Telecom Companies, Mobile Operators and Internet Service Providers. The MailObject® technology has been engineered to deal with millions of users. It provides high quality of service and delivers great flexibility. Additionally, it is a very **cost-effective solution deployable in record time**, in particular WEBMAIL COMS, GATEWAY COMS, FAMILY COMS and MULTISITES COMS which are off-the-shelf products.

MailObject® offers on the one hand household e-mail services and on the other hand pro services, more particularly dedicated to corporate customers. **A multitude of different messaging services can be simultaneously processed on the same software platform.** Each one of these services is customizable and skinable according to the needs of the target audience: household customers, associations, small, middle size or big corporations, etc.

Every MailObject® pro messaging service has an integrated set of complete services: e-mail, voice mail, SMS, MMS, fax, address book, telephone directory, calendar, documents storage, Text-To-Speech, shared access, ...

The MailObject® technology is a true full IP unified and convergent messaging solution, 100% software. It gives users the advantage of having a singlemail box for e-mail, voice mail, SMS, MMS and fax.

This type of fully integrated platform, totally customizable and evolutionary, is truly unique in the marketplace.

Its universality is another differentiator: **MailObject® is natively multilingual, multi-alphabet** and totally compatible with all standards (Unix, protocols, servers, languages and databases).

Finally, MAIL OBJECT commits to **drastically reduce costs** (licences, maintenance, operation) its new customers have incurred with their previous electronic messaging solutions.
